EDUCATION

NUST-SEECS, Islamabad— *Software Engineering*

Oct 2020 - June 2024

EXPERIENCE

Vyro, Wyoming (US) — *Full Stack Engineer*

April 2024 - PRESENT

- Led the development of [ImagineApps](#) and [Voice Studio](#), including key features like [text-to-speech](#) and [voice cloning](#).
- Worked on features and bug fixes across different studios of [Imagine](#).
- Enhanced SEO and streamlined landing page creation by leveraging Strapi and generating pages at build time, reducing manual effort and improving performance.
- Participated in code reviews to maintain high-quality, scalable code.
- Optimized dashboard feeds by implementing pagination, virtualization, and blurhashes for better performance and UX.
- Contributed to core platform features like subscriptions and user experience improvements.
- **Technologies Used:** Next.js, Tailwind CSS, TypeScript, React query, Shadcn-ui, Zustand, React-Hook-Form, Git, Linear, Vercel.

MaydayAI, Darmstadt (Germany) — *Full Stack Engineer*

July 2024 - April 2025

- Built [Guardian Pro](#) from the ground up as a solo developer, delivering a fully functional MVP in under 3 months.
- Utilised NextJs and Mapbox with a strong focus on performance optimization and memory management.
- Implemented a complete AI chatbot with a history feature.
- [Demo](#)
- **Technologies Used:** Next.js, Tailwind CSS, TypeScript, React query, Shadcn-ui, Zustand, Git, Vercel.

SKILLS

ReactJs
NextJs
TypeScript
Tailwind CSS
ReduxJs Toolkit
Zustand
Tanstack React query
Bootstrap
Material UI
NodeJs
ExpressJs
NestJs
Supabase
MySQL
MongoDB
Prisma
AWS EC2
AWS ECS
Docker
K8s
Vercel
Git

LANGUAGES

English,Urdu,Hindi

Mimar Studios, Islamabad — Full Stack Engineer

Jan 2024 - April 2024

- Developed and deployed servers using Node.js and Express on AWS EC2.
- Built web apps with React and Redux Toolkit, integrating custom APIs.
- Integrated Bank Alfalah payment gateway for secure transactions.
- Technologies: Node.js, AWS EC2, React, Redux
- **Technologies Used:** Node.js, Express.js, AWS EC2, Python, React.js, Redux.

Alta Tech Mark, Remote — Full Stack Engineer

June 2023 - Dec 2023

- Managed server-side and Frontend development for IoT projects using React and Node.js.
- Developed an IoT system for monitoring an indoor plant ecosystem, integrating sensor data and actuator control.
- **Web Application Development:** Built the organizational website using the MERN stack (MongoDB, Express, React, Node.js).
- **Technologies Used:** Node.js, Express.js, MongoDB, React.js, Tailwind CSS, Material-UI (MUI), Redux, Git.

Internships

Walee Tech, Islamabad — MERN Stack Developer

Oct 2022 - Dec 2023

Logics Yard, Remote — MERN Stack Developer

Jan 2023 - June 2023

T-Tech Solutions, Remote — ReactJs Developer

Mar 2022 - August 2022

PROJECTS

Hitchhub —

A web app backend built with Nest.js for seamless carpooling and ridesharing. Features include robust security, real-time updates, and a focus on sustainable transportation. Hitchhub connects users and promotes community through eco-friendly travel solutions.

Zone Dropshipping —

Developed a freelance dropshipping platform with distinct client and admin sections. Admin features include managing dropshippers, tracking

payments, and posting announcements. Integrated M&P Couriers for efficient order delivery.

Enigma —

Built the frontend of Enigma using React, Tailwind, MUI, and Redux, with a Node.js and Express backend. The application highlights various Enigma products and their applications, including Enigma Key and Enigma SSD.
